A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/7/03 has been entered.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hawkins et al in combination with applicant's admitted prior art.

Applicant admits the process of forming strip-shaped semiconductor regions in a first direction by implantation through an oxide layer followed by removal of the oxide layer and formation of a gate dielectric upon which is formed strip-shaped gate electrodes running perpendicular to the first direction to have been known prior to applicant's invention. The admitted prior art process does not include implantation through the gate dielectric material upon which is formed a gate.

Hawkins et al is applied as stated in the rejections under U.S.C. § 102 and 35 U.S.C. § 35 U.S.C. § 103(a) in the office action mailed 4/22/03 as disclosing formation of electrodes on a nitride oxide gate dielectric through which implantation has been performed thus providing motivation to implant through a retained nitride/oxide gate dielectric material as opposed to the sacrificial oxide material of the admitted prior art process.
